Reduce costs and improve efficiency with mobile forms

ScanLink Form Builder enables you to quickly and easily generate mobile interactive forms that can be accessed instantly on demand by smartphone and tablet users via Quick Response or Data Matrix mobile interactive codes featured on labels, signage and documents throughout the workplace.

You're in control

User-friendly tools enable you to instantly create and edit your own branded content including video, text, pictures, documents, forms, web links and more - No computer programming skills required.

Any device

ScanLink is not a device restricted software application.

The platform utilises cloud mobility to store and serve your content providing access to multiple types of smartphone or tablet devices on demand.

Powerful Analytics

A comprehensive suite of analytics tools record engagement, user data and trends - even for specific question & answer responses.

Workplace label solutions

Our industrial labels are water, UV, chemical and abrasive resistant with a 5 year warranty and rated to withstand temperatures up to 93°C.

We supply single label orders and print your own equipment packages.
